THIS PUPPY IS GUARANTEED AS FOLLOWS:

If a veterinarian finds the puppy to have a contagious disease or to have a serious physical condition other than a bacterial infection such as coccidian or giardia which are easily treated, the seller will replace the puppy with another puppy of comparable or better quality. The seller reserves the right to a second veterinarian opinion at the expense of the seller. No monies will be refunded.

To be free from any genetic / hereditary defects that cause death or serious impairment of the vital functions in the puppy until said puppy is one year of age. If such an inheritable defect is documented by a Veterinarian and presented to the seller with sufficient supporting evidence, the buyer will be entitled to a replacement puppy of the same sex, of comparable or better quality, when available from same or upcoming litter, after the first puppy is returned to seller. No cash refunds given and we will not pay any vet bills. Above warranty excludes hip and joint related issues. Buyer agrees in buying a puppy that he or she understands the certain common limitations of the bulldog breeds such as joint issues and that most bulldog puppies if X rayed will evidence some form of mild to moderate hip displasia. Loose hips on bulldog puppies are common and rarely prevent a bulldog from walking or functioning as a lovable pet. Adult dogs sold are not covered herein and any/all adults will be sold on an "as is" basis".

Please be aware that puppies are considered high risk for Coccidia and Giardia (both cause bloody stools). These health issues are usually easily treatable with inexpensive medicine. They are often brought on by the stress of shipping, a new home, new food, new people, change of climate or surroundings. Shipped puppies seem more prone to showing symptoms of Coccidia or Giardia. Another

thing that may show up with shipping and/or the stress of moving to a new home is Kennel Cough (Bordatella-raspy cough). Kennel cough, Coccidia or Giardia on their own are not life threatening. All puppies are preventatively treated for worms, Coccidiosis, and Giardia, before they leave. Puppies will also be up to date on the puppy vaccinations consistent with their age. The above issues are not considered life threatening. But if you do see potential symptoms do have the vet look at your puppy.

It is understood that at the time of this sale the puppy is not guaranteed to be of show quality or breeding quality. Puppies will change as they mature. Ugly ducklings seem at times to turn into swans and sometimes swans seem to turn into ugly ducklings.
